

Luminous Beauty Consent Form

Immediately after the session: TRUST THE HEALING PROCESS

- Take cotton rounds I provide to you and dab your brows for 30 minutes to absorb lymphatic drainage/bleeding. (Only if needed, practitioner will inform).
- After 24 hours, it is ok to gently wash your brows with water and a gentle cleanser only. Please wipe in the direction of hair growth. Pat dry, do not scrub. Keep brow area clean at all times.
- Apply a small amount of the healing balm I provided, two to three times a day. This is important to add moisture to the skin and avoid dry healing or scabbing. Only apply with clean hands or a cottonswab.
- DO NOT stand facing the shower head during the healing process. Avoid all excessive water exposure.
- DO NOT rub, pick or scratch the treated area. Let any scabbing or dry skin naturally exfoliate. Picking can cause infection, scarring or pigment loss.
- Avoid pools, sauna steam rooms, hot showers and hot baths for 2 weeks.
- Avoid excessive sweating for the first 2 weeks.
- Keep hair bangs pulled back and away from the treated area.
- Do not use makeup or skincare products on the treated area for 2 weeks.
- No facials, laser treatments, chemical treatments and micro-dermabrasions for 4 weeks.
- Use sunscreen after 10 days of healing. Keep brows out of the sun to avoid fading. (I highly recommend purchasing "INKGUARD" on amazon. It is \$10 and will last you years!)

Healing Guide by Days:

Day 1-4

The Eyebrows are approximately 40% darker and bolder than they will be once they are healed. Your skin will be pink or red under the pigment which will cause the color of the pigment to look much darker. Redness and swelling will subside. Eyebrows might start to itch and may appear to be much thicker in texture.

Day 5-9

The skin's dead cells will begin to flake, and peeling might begin around the edges of the brows and the natural Scabbing/exfoliating will begin.

10days +

Color will finish flaking off and appear patchy and much lighter and softer. Allow for the color to fully develop. Allow skin to heal to retain pigment. Pigment will then become darker and settle into skin. By the 30th day you will see the final results and will be coming in soon for your perfecting session. TRUST THE HEALING PROCESS.

In the next 30 days AVOID:

Sunbathing, solarium, light therapies, chemical peelings, fruit acids, microdermabrasion, creams that contain regeneration factors. Always avoid laser treatments over the treated area (Fraxel laser, IPL), because they can destroy the pigment and cause burns.

Use of antibiotics and hormonal therapy can lead to a faster pigment fading. Always protect the eyebrows from the sun with SPFs (not during the first 7 days).

Avoid the following: Gardening, Close contact with multiple types of animals the first 4 days

SIGNS AND SYMPTOMS OF INFECTION: *Please seek immediate medical attention if any of these signs/symptoms occur*

REDNESS - SWELLING - TENDERNESS OF EYEBROWS - RED STREAKS FROM SITE TOWARDS THE HEART - ELEVATED BODY TEMPERATURE - PURULENT DRAINAGE FROM EYEBROWS - HOT TO TOUCH - ANY TYPE OF DRAINAGE - HIGH FEVERS OVER 100.00 Farenheight
